*The
No Compromise
Fabric Structure*

Commercial Structures

For 40 years, Winkler Structures has provided an affordable option to protect your assets, our standard and custom structures are designed with the your operations in mind. Our structures provide many industrial applications including warehousing, maintenance, manufacturing, equipment storage, and more.

The Winkler Advantage

Strong and Resilient

Our tensioned fabric and steel design enables our structures to withstand anything Mother Nature can throw at it. Our structures have been tested in the extreme snow, wind, rain, and heat conditions and are still standing after 20+ years.

Install is Fast and Simple

When you need a structure we understand that you might need it right now! Many Winkler Structures are easily constructed within 3-5 days.

Portable and Storable

Need a temporary storage solution and don't want waste time and money building a permanent structure? Winkler structures can easily be deconstructed and stored until you need it again. Our steel frames are galvanized to prevent rust or corrosion while it's stored. The fabric covers can be easily rolled and stored alongside the steel.

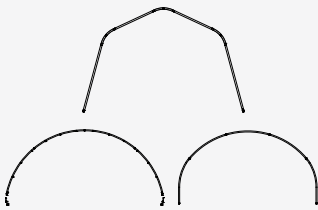

A Structure For Every Application

No matter what the application, Winkler Structures has the solution fit for the job. Our wide range of structure profiles allows us to cater to any project.

If your project requires a specific building profile other than our standard line-up, our in-house designers will work closely with you to design and engineer a structure that fits your needs. Our structures range from 12' wide up to 120' wide; and we can design for any length requirement.

Benefits

- ✓ Experience large savings vs traditional buildings
- ✓ 15-20 degrees cooler in summer
- ✓ 15-20 degrees warmer in winter
- ✓ 83% natural daylight transferred through the white cover
- ✓ 15 year warranty
- ✓ Cover designed to last 20+ years
- ✓ Natural Resources Conservation Service (NRCS) certified designs

Fit For The Job

Preferred Vendor

Boasting 40 years of designing and manufacturing innovative, quality products; Winkler Structures has become a preferred vendor for many States and Provinces across North America.

Capable

Winkler Structures' 60,000 sq.ft. facility includes an in-house design team, steel manufacturing, fabric production, research & development site, and office headquarters.

Convenient Location

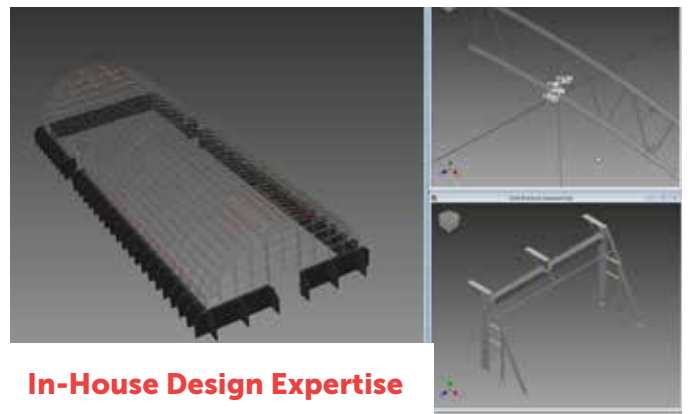

Located directly in the middle of North America just 20 miles north of the USA border, Winkler Structures is equipped to provide speedy delivery as well as handle all shipping logistics in-house.

Certifications

Winkler Structures is certified with the all necessary industry-standard certifications.

Winkler Structures 60,000 sqft manufacturing facility.

In-House Design Expertise

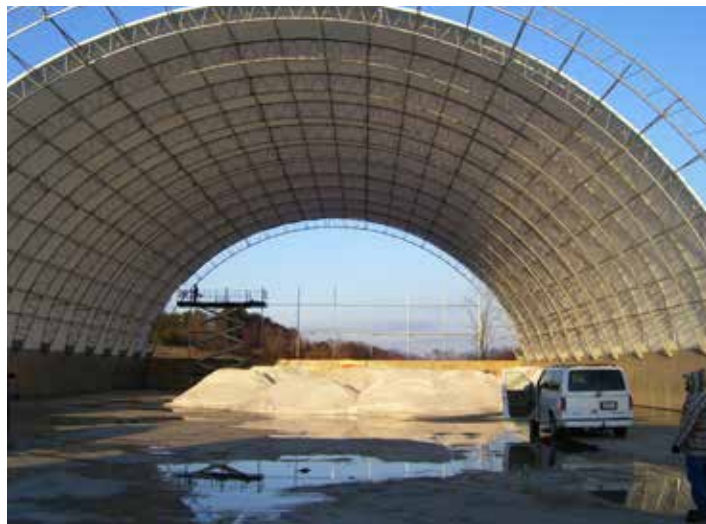

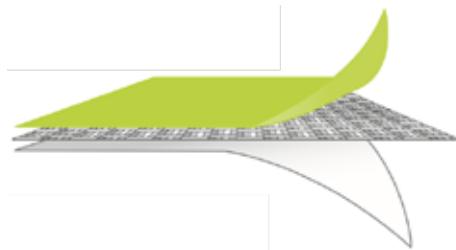

Layers of Protection

Our structures are made with Gatorshield Galvanized Steel, with superior, triple-layer rust and corrosion resistant product protection.

Superior Coverage

Our 12 oz. fabric covers offer rip, puncture, and tear resistance, and are virtually maintenance free. With the option of fire retardant material; our covers last for decades.

What Our Customers Are Saying

"I needed something to immediately protect our salt and sand but I wanted to be able to expand in a few years. Winkler Structures were able to give me that while staying under my budget. I will no doubt work with Winkler again on the expansion project."

- Dan Belleau, Township of Dundas Ontario

Options

Winkler Structures has the ability to customize almost anything on your structure. If you don't see what you're looking for in the list below, just ask; there is a good chance Winkler Structures can make it happen.

- ▶ Vent kits
- ▶ Ridge vents kits
- ▶ Eave kits
- ▶ Curtain systems
- ▶ Door systems
 - ▶ Steel roll up doors
 - ▶ Chain hoist doors
 - ▶ Accutrack doors
 - ▶ Cable doors
- ▶ Full, half-moon or custom end walls
- ▶ Numerous base plate styles
- ▶ Truss end covers
- ▶ Sliding vent frame
- ▶ Drip edge addition
- ▶ Mesh vents
- ▶ Extending end walls
- ▶ Insulation packages
- ▶ Hanging loads

| ▶ Freestanding | ▶ Precast concrete walls | ▶ Ground stakes |
| ▶ Wood walls | ▶ Concrete piles | ▶ Shipping containers |
| ▶ Steel walls | ▶ Screw piles | |

Permanent or Temporary Facilities

Winkler Structures can be installed in as little as a week and can be deconstructed and moved in the same amount of time, saving a significant amount of upfront costs in construction time.

Weather Protection

Get peace of mind with a Winkler Structure and the all-weather protection it offers. Our fabric buildings have been tested in extreme snow, wind, rain, and heat conditions and are still standing after 20+ years.

Warehousing

Our clearspan design allows you to maximize your floor space. Moving product throughout the structure is simple without columns obstructing the floor space.

Maintenance

Winkler Structures allow the majority of the light to pass through the fabric membrane, which equals huge savings when it comes to electricity costs. Daytime maintenance can take place without artificial lighting.

Bulk Storage

Winkler Structures can grow with your business. Ask about extension packages.

Salt/Sand Structures

For superior corrosion resistance, Winkler Structures offer liner packages as additional protection and to extend the building's life.

Sea Can Structures

A sea can building provides endless possibilities.

Ideal for maximizing space in remote locations by using the sea can interior for washrooms, lunchrooms, tool cribs, meeting space or secure storage.

When changing job sites, simply dismantle the building and load materials into the sea can for easy transport to eliminate your footprint.

Insulation Packages

When insulating your fabric building, don't lose the light.

A critical benefit to a fabric building is the natural light offered by the polyethylene cover. Traditional insulation blocks this light and blocks access to structural components. It can also sag when wet, which creates air

gaps - rendering your insulation useless.

Ask us about insulation packages that keep your structure's interior bright and allow access to the building frame.
